4moms® mamaRoo®

The new mamaRoo is the first-ever, app-controlled infant seat. The Bluetooth-enabled seat allows parents to control motion, speed and sound from an iOS or Android device. In addition to connectivity and new design, parents can expect all the favorite features of the original mamaRoo. It's the only seat that bounces up and down and sways from side to side just like parents do when comforting their infants.

FEATURES

Advanced Robotics & Design
Motion control software and dual-axis coordinated motion robotic platform mimic the same motions of a parent comforting their baby. The new mamaRoo has an updated LCD interface and one-touch, direct access to product registration and customer support from the new 4moms app.
